EDUCATION

University of South Carolina

Expected Graduation: May 2027

Bachelor's of Science in Computer Science

- **Relevant Coursework:** Advanced Programming Tech, Algorithmic Design I & II, Data Structures and Algorithms, Digital Logic Design, Operating Systems, Software Engineering, Programming Language Structures, UNIX/Linux Fundamentals, Introduction to Computer Architecture, Database System Design, Intro to Computer Networks
- **Extracurricular Activities:** American Association of Engineers of Indian Origin, CodePath, Association for Computing Machinery, Minorities in Tech

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++, HTML/CSS, SQL
- **Frameworks and Libraries:** React, Flask, Ruby on Rails, JavaFX, AWS SDK, NumPy, OpenCV
- **Software and Tools:** Git, Docker, Linux, VS Code, Firebase, MongoDB, MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

Manager

May 2024 – Present

AMR Services

Rock Hill, SC

- Developed and maintained Excel-based financial tracking sheets to manage profits, expenses, and revenue, using data analysis and financial modeling
- Designed and implemented a payroll system using spreadsheet formulas to calculate employee compensation based on job attendance and profit sharing, reinforcing logic and problem-solving skills

Software Engineering Intern

Jul 2025 – Sept 2025

Chinchilla AI

Remote

- Built full-stack car infotainment system with FastAPI backend and JavaScript frontend, integrating Google Maps and Spotify APIs for navigation and media streaming
- Collaborated in agile environment with daily standups and used AI tools to accelerate delivery of portfolio-ready demo
- Developed AI-powered stock analysis platform aggregating multi-source financial data and news sentiment to generate automated recommendations for S&P 500 securities

PROJECTS

LingoQuest - Java, JavaFX, AWS Polly, Maven, JPMS, HTML/CSS

- Collaborated with 4-person team to architect enterprise-grade language learning platform with 15+ JavaFX controllers, AWS Polly text-to-speech integration, modular Maven/JPMS architecture, live leaderboards, and 4 interactive question types using MVC design pattern
- Engineered multiplayer functionality with dynamic friend requests, persistent rankings, adaptive difficulty algorithms, and gamification features including streak tracking and coin rewards to increase user engagement by 30%

AMR Booking System - Python, Flask, JavaScript, HTML/CSS, PostgreSQL

- Developed a full-stack web application for a real landscaping and pressure washing business, automating customer bookings and scheduling workflows to reduce manual operations by 80%
- Built a responsive frontend with Bootstrap 5 and Google Maps API integration, implementing secure authentication with Flask-Login, Werkzeug hashing, and role-based access for customers and admins
- Designed normalized database schema with PostgreSQL/SQLAlchemy and deployed production system to Render with RESTful APIs, automated deployments, and email notifications via SMTP/SSL serving 50+ weekly bookings

LEADERSHIP EXPERIENCE

Phi Iota Alpha

May 2024 – May 2025

Alumni Relations Director

University of South Carolina

- Designed and maintained alumni contact database using Google Sheets and automation tools, improving outreach capacity.
- Coordinated email campaigns and digital updates, increasing engagement with events and chapter news for 100+ alumni.
- Led technical setup for hybrid events (Zoom), enhancing accessibility and communications.

ADDITIONAL SKILLS & INTERESTS

Agile Development Methodologies, Full-Stack Development, AI/ML Integration, Cloud Deployment, Automation, API Design, Cross-Functional Collaboration, Building Solutions for Real Businesses, Analytical Problem Solving, Debugging, Unit Testing
